ADD CONTACT

--

Assigning names to addresses is something of which we've yet to find the right example in other desktop-wallet applications. As a result, our flow has several options for adding contacts within the Spacemesh Wallet App. The options are as follows:

Option 1: The user can add contacts on the main “SEND SMC” page while making a transaction.

Option 2: Upon completing a transaction and receiving the summary page, the user will have the option to add a contact via accessing the “CONTACTS” list.

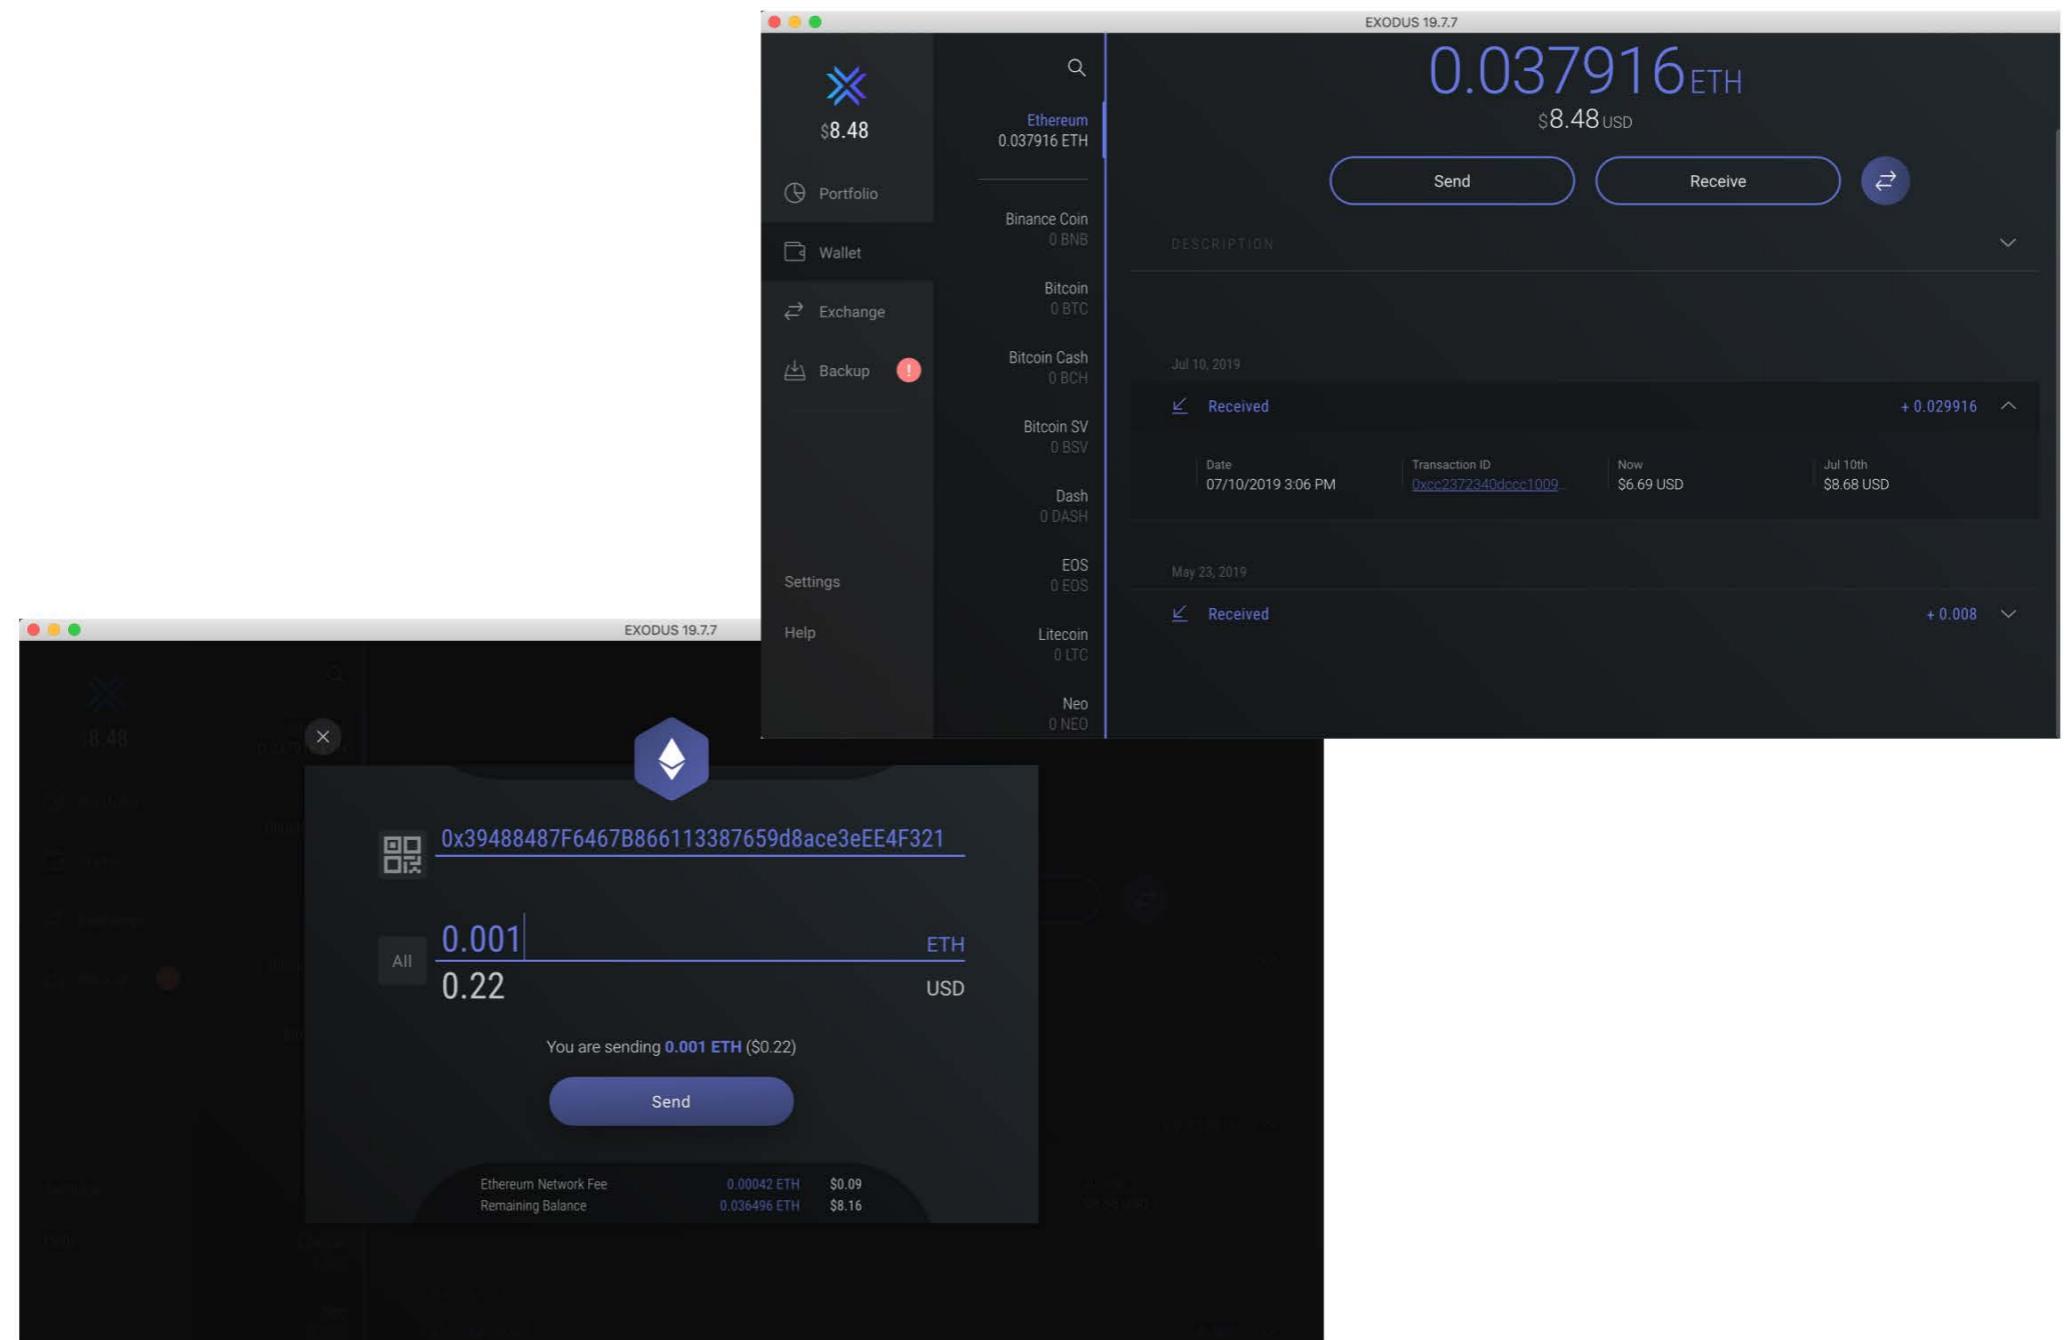

EXAMPLES

--

Upon researching other apps, we discovered that the action of adding a contact was not present in the transaction flow.

--

In the Exodus desktop wallet, the only identifier used is the public address, and no other functions are present during the act of setting up a transaction.

--

In Metamask, the user can only add wallet addresses and no contacts are present throughout the transaction flow.

The screenshot displays the MetaMask extension within a web browser. The main window shows the account balance for 'Account 1' (0.015 ETH / \$3.13 USD). Below this, a modal dialog titled 'Send ETH' is open, allowing the user to enter recipient details and transaction parameters. The transaction fee is set to 'Average' at 0.00021 ETH (\$0.04).

Send ETH Dialog Fields:

- From: Account 1 (0.019313 ETH / \$4.02 USD)
- To: 659d8ace3eEE4F321
- Asset: ETH (Balance: 0.019313 ETH)
- Amount: 0 ETH (\$0.00 USD)
- Transaction Fee: Average (0.00021 ETH / \$0.04)

Account History:

Date	Type	Value
#4 - 7/18/2019 at 11:48	Sent Ether	-0.004 ETH -\$0.83 USD
#3 - 7/18/2019 at 11:48	Sent Ether	-0 ETH -\$0.00 USD
#2 - 7/8/2019 at 09:36	Sent Ether	-0.03 ETH -\$6.25 USD
#1 - 7/8/2019 at 09:21	Sent Ether	-0.03 ETH -\$6.25 USD
#0 - 7/8/2019 at 09:19	Sent Ether	-0.03 ETH -\$6.25 USD

OPTION 1: IN TRANSACTION

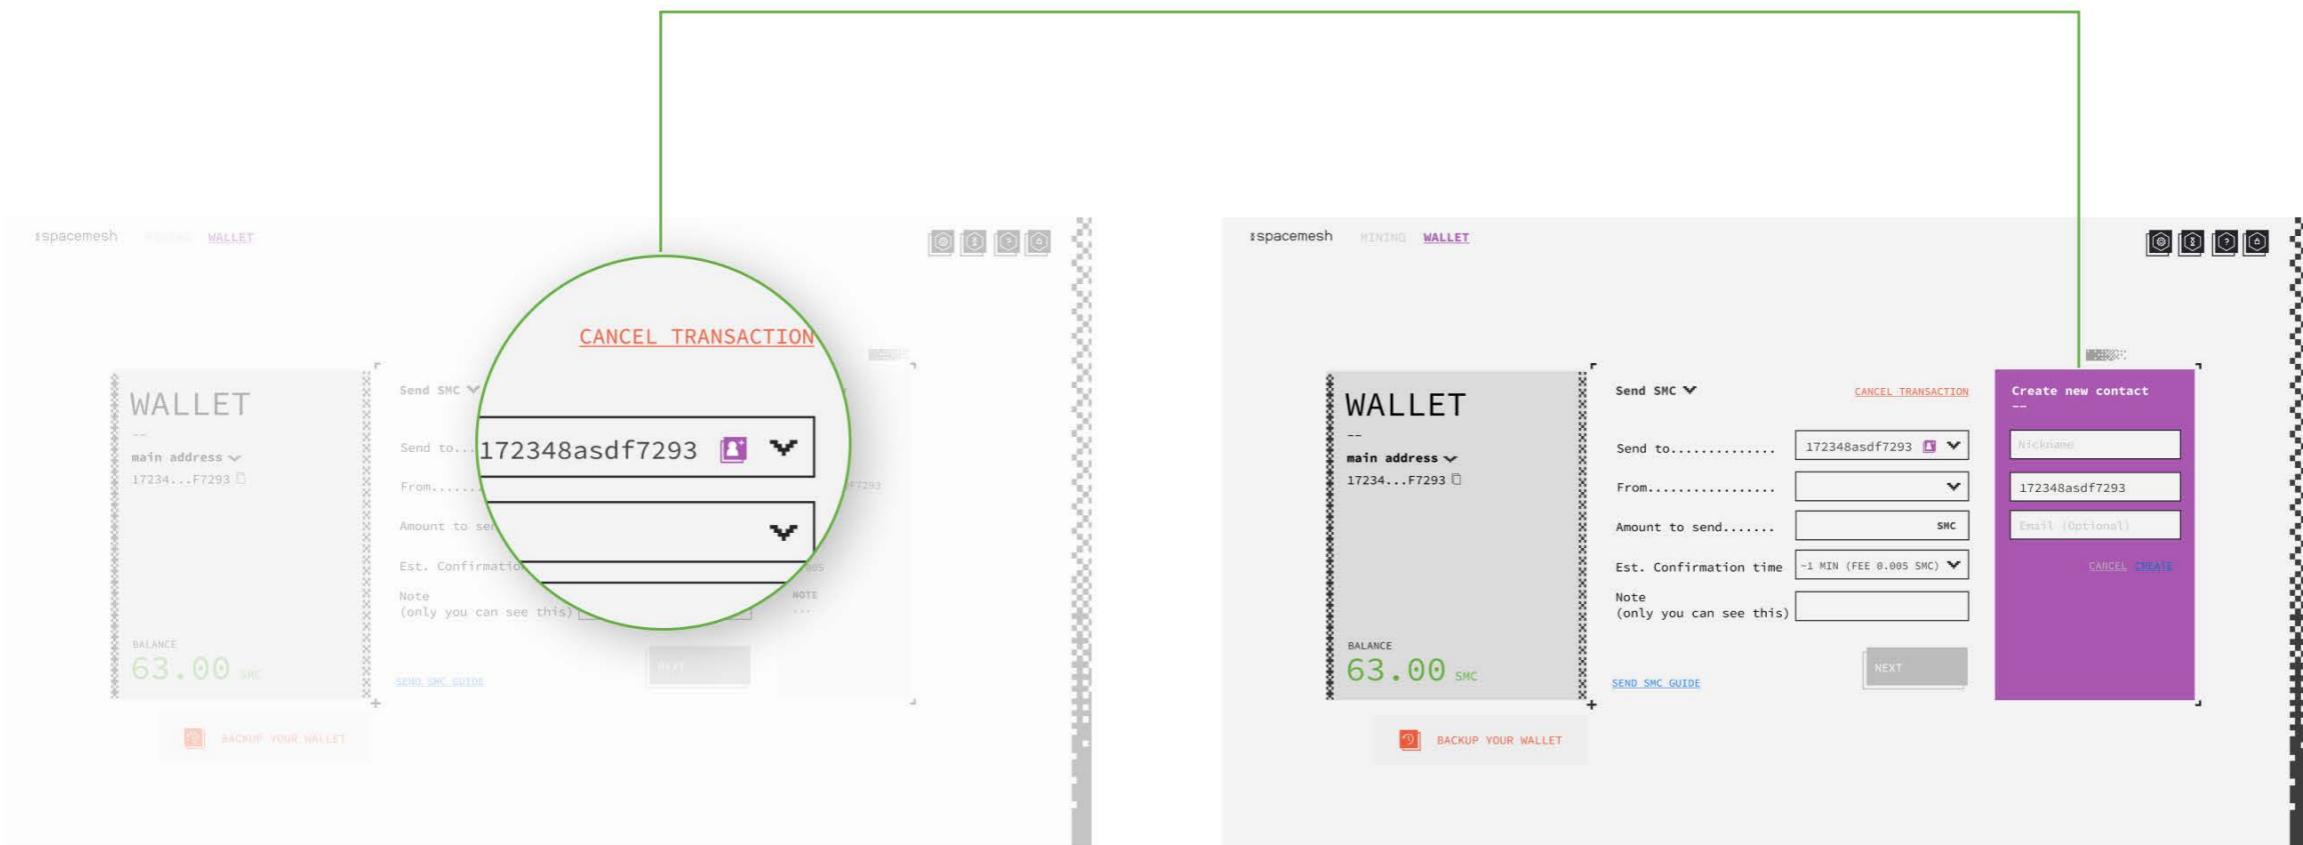

--

Adding a contact while in the transaction flow.

*We don't recommend this version because it distracts from
the "SEND SMC" flow. Additionally, users will have the
option to add contacts via either the "SMC SENT" page that
follows the transaction, or the dedicated "CONTACTS" page.

--

In the SMC Wallet App, the user has the option to add a contact by opening a panel on the right. This will keep the user inside the transaction flow.

OPTION 2: AFTER TRANSACTION (CONTACTS PAGE)

--

After the user has completed a transaction, the “SENT” page will show an “add contact” icon which will then route the user to the “CONTACTS” page. Once there, the user can complete the process of creating a contact.

--

To access full functionality, the actual Contacts page can be immediately reached through an icon on the transaction summary page.
